## *Superior Court of California* *County of Los Angeles*

August 27, 2012

Hon. Brad R. Hill  
Administrative Presiding Justice  
Fifth District Court of Appeal  
Court Facilities Working Group

**Re: Proposed Process for Selecting SB 1407 Projects to Move Forward**

Dear Justice Hill,

Thank you for the opportunity to reinforce the significance of the six projects to be funded by SB 1407 funding in Los Angeles County. These projects serve countywide needs (new Mental Health Courthouse), regional needs (new Eastlake Courthouse and renovated McCourtney Courthouse) and several local needs (new courthouses in Santa Clarita, Glendale and South Gate).

Over the past several years, our Court and our County partners have participated in the process that generated multiple reviews and assessments of facilities needs. The specifics of the need for these facilities are well-documented through several years of reviews and documentation. Our attached responses refer to those reviews.

Our county and municipal partners have been active participants in preparing for these projects. As you will see in the attached and will learn from AOC staff, the County has provided consideration for land for the Santa Clarita Courthouse, has been active in the siting of the Eastlake Courthouse and Mental Health Courthouse, and is providing consideration for temporary relocation during construction of the Glendale Courthouse. We all have invested much in anticipation of these important projects.

The budget crisis has made these projects no less critical to our ability to provide access to justice. Indeed, as further budget reductions are made, a new, state-of-the-art courthouse in each of these areas would provide an attractive location to build services around. Despite reductions in the number of delinquency courts, for instance, a new Eastlake Courthouse, adjacent to the juvenile hall, will prove a tremendous asset around which to build a more efficient juvenile delinquency system. In each instance, the need for these projects has not lessened since they were deemed immediate or critical needs.

Hon. Brad R. Hill

As a related matter, as you know we discovered yesterday a letter from Senator Mark Leno, as Chair of the Joint Legislative Budget Committee, that suggests the possibility that the annual service contract payments for the soon-to-be-completed Long Beach Courthouse may come from courthouse construction funding, rather than General Fund moneys (see attached). It is unclear how this possibility factors into the work of your committee – and thus how the matter will be treated at the September 5 hearing. We hope to discuss this issue with you prior to the hearing.

Respectfully,

  
John A. Clarke  
Executive Officer/Clerk

Ms. Jody Patel, Interim Administrative Director  
Administrative Office of the Courts  
455 Golden Gate Avenue  
San Francisco, CA 94102-3688

Dear Ms. Patel:

In June of 2011, I sent a letter to the Administrative Office of the Courts (AOC) expressing my concerns regarding the new Long Beach Courthouse performance-based infrastructure (PBI) project. Similar concerns were raised in 2008 by then JLBC chair, Senator Denise Ducheny.

Specifically, I expressed concerns about components of the "value for money" (VFM) analysis used to justify use of this model over the public sector method (PSM) and the resulting possibility that the state could pay significantly more over time for this project than otherwise would be needed to replace the existing court facility.

At that time, I suggested that the AOC pursue other options with the developer to keep the project on track and reduce the state's overall project costs. I also expressed concern that the VFM analysis of this project should not be assumed as the state's model for comparing PBI and PSM approaches on future projects and suggested that your office work with legislative staff on a project evaluation plan.

In January, your office shared an evaluation plan that included submission of several evaluation reports to the Legislature. Specifically, the AOC committed to providing the following:

- March 1, 2012 Development of Project Agreement
- March 1, 2012 Implementation of Project Agreement – Initial Report
- Beginning June 1, 2012 Implementation of Project Agreement – Quarterly Reports
- December 1, 2012 Implementation of Project Agreement – Design Build Phase Summary

To date, no reports have been provided and at a recent meeting legislative staff was informed that no report will be provided before October, 2012.

Ms. Jody Patel

Page two

Further, the AOC evaluation plan does not provide a full analysis of the validity of the VFM assumptions used to justify the project and will not compare this project to other courthouses constructed by the AOC using the PSM model. These are essential components of any evaluation if it is to have value in determining the viability of any future PBI projects and I continue to encourage the AOC to incorporate these important elements into their evaluation design.

When the PBI approach for the Long Beach Courthouse project was first presented in 2008, the total project costs were estimated to be \$346.1 million, with an annual service contract payment of \$30 million. Today, the project costs stand at \$725 million, with the annual service contract payment now potentially ranging from \$50 million to \$73 million annually over the course of the 35-year contract.

At the recent meeting between legislative and AOC staff, we were informed that a Court Facilities Working Group of the AOC will be meeting in early September to make recommendations relative to establishing priority court construction projects to be funded through the SB 1407 process and that the Long Beach courthouse project would not be considered in this discussion. Rather, it is the intent of the AOC to request a General Fund appropriation for this purpose.

Given the enormity of California's budget crisis, it seems highly unrealistic for the AOC to expect the state General Fund to support the Long Beach Courthouse project. As you know, the state budget approved in June contained deep reductions in General Fund expenditures across all areas of state government. This included \$544 million in reductions to the Judicial Branch, with a redirection of \$240 million from trial court construction to support trial court operations. It is surprising to me that, given the reductions that occurred this year, the AOC would continue to view the General Fund as a realistic option to support the Long Beach Court project. I would strongly encourage you to look at the resources made available through SB 1407 (Chapter 311, Statutes of 2008) or SB 1732 (Chapter 1082, Statutes of 2002) as a more reasonable option.

Sincerely,

Mark Leno  
Chair
